St. Louis County To Provide Text Message Alerts To Keep Community Updated On Coronavirus Information

ST. LOUIS COUNTY (March 20, 2020) County Executive Dr. Sam Page announced on Friday a text message service to increase the ways the community can stay updated on the latest coronavirus information.

“Increasing access to information as this issue quickly evolves is crucial. Text message alerts are just another way to do that in addition to our website, stlcorona.com, which is updated daily,” said County Executive Page.

To receive alerts: Text STLOUISCOALERT to 67283

St. Louis County has a 24-hour coronavirus hotline -- 314-615-2660. We strongly urge that the hotline be reserved for residents experiencing symptoms of fever, cough, and difficulty breathing. Those who have reason to believe they have encountered a person infected with COVID-19 should also utilize that number.

For general information about coronavirus, please visit stlcorona.com.

At any time you would like to stop receiving alerts, Text:STOP STLOUISCOALERT to 67283.
